

## Vous allez publier ?

Avant d'envoyer votre manuscrit, merci de prendre connaissance du paragraphe 'Diffusion des résultats des recherches' de la [Charte pour l'accès à la cohorte Constances](#).

### Ethics approval and consent to participate

The authors assert that all procedures contributing to this work comply with the ethical standards of the relevant national and institutional committees on human experimentation and with the Helsinki Declaration of 1975, as revised in 2008. All procedures were approved by the Institutional Review Board of the French Institute of Health (INSERM). The Constances Cohort study has also been approved by the French Data Protection Authority ("Commission Nationale de l'Informatique et des Libertés", CNIL). Written informed consent was obtained from all participants.

### Role of the funding sources

The Constances Cohort Study was supported and funded by the French National Health Insurance Fund ("Caisse nationale d'assurance maladie des travailleurs salariés", CNAMTS). The Constances Cohort Study is an "Infrastructure nationale en Biologie et Santé" and benefits from a grant from the French National Agency for Research (ANR-11- INBS-0002). Constances is also partly funded by Merck Sharp & Dohme (MSD), AstraZeneca and Lundbeck. None of these funding sources had any role in the design of the study, collection and analysis of data or decision to publish.

### Acknowledgments

The authors thank the team of the "Population-based Epidemiologic Cohorts Unit" (Cohortes épidémiologiques en population) that designed and manages the Constances Cohort Study. They also thank the French National Health Insurance Fund ("Caisse nationale d'assurance maladie des travailleurs salariés," CNAMTS) and its Health Screening Centres ("Centres d'exams de santé"), which are collecting a large part of the data, as well as the French National Old-Age Insurance Fund ("Caisse nationale d'assurance vieillesse") for its contribution to the constitution of the cohort, and ClinSearch, Asqualab and Eurocell, which are conducting the data quality control.
